

HighgeneTM Water Purifier

Highgene Water Purifier (HWP-1) is the optimal solution for your water purification needs to get clean and safe drinking water for input water with less than 500 ppm Total Dissolved solids (TDS)

Ideal purifier if input water source is any one of the following.

River Water / Open Well Water

Municipal treated water
By Chlorination

TDS
(Total Dissolved Solids)
Water with less than 500 ppm

NO Electricity
Water wastage
Mineral Lost

HWP-1 Water Purifier
Works with 3 stage purification system

1 : Yarn Wound Sediment Filter
with High Dust Holding Capacity
which captures sediment particle
more than 5 microns in size.

2 : Activated Carbon Block (CTO)
which helps in removing unwanted
Colour ,Taste and Odour in water
and also reduce Harmful Heavy Metal,
chlorine & chlorination by-products to bring
it within drinking water specifications.

3 : Ultra filtration
Helps in removing disease causing
microorganisms in water
and makes it safe for drinking purpose.
The pathogenic microorganisms
reduction is 99.999%
as per test reports from reputed Laboratories.

Your drinking water is now clean and safe for you and your family
